SESSION OF 2019

SUPPLEMENTAL NOTE ON SENATE SUBSTITUTE FOR
HOUSE BILL NO. 2007

As Recommended by Senate Committee on
Transportation

Brief*

Senate Sub. for HB 2007 would amend requirements for
tolled projects of the Kansas Turnpike Authority (KTA) and the
Secretary of Transportation.

KTA Requirements

The bill would remove from a definition of “project” that
such project be constructed by the KTA. (Section 1)

The bill would authorize the KTA to issue revenue bonds
payable partly, rather than solely, from revenues to finance
turnpike projects. The bill would require the KTA, before
undertaking a toll road project, to find construction of a toll
expressway can be financed partly, rather than wholly,
through the investment of private funds in toll road revenue
bonds and that such project and any indebtedness incurred
for it could be financed partly through tolls and other project-
related income, rather than such project and indebtedness be
entirely self-liquidating. (Section 2)

The KTA would be authorized to issue turnpike revenue
bonds payable partly, rather than solely, from the tolls and
revenues pledged for bond repayment. (Section 3) Bonds and
expenses would be payable partly, rather than solely, from
funds provided under the authority of statutes governing the

KTA. (Section 4) [Note: Under continuing law, such bonds and expenses are not obligations of the State.]

The bill would amend the authority of the KTA to fix and collect tolls over each turnpike project to remove the requirement that such project be constructed by the KTA. (Section 3)

**Secretary of Transportation Requirements**

The bill would authorize the Secretary of Transportation (Secretary) to study the feasibility of constructing new toll or turnpike projects and remove authority to designate existing highways or any portion of such highways as a toll or turnpike project. The bill would require a study by the Secretary of a project for its feasibility as a toll or turnpike project to determine, after consulting with local officials, that traffic volume, local contribution, or other relevant reasons make such tolling project feasible. The bill would require any toll or turnpike project be constructed only to add capacity to existing highways or bridges or as a new facility where such did not exist. (Section 5)

The bill would require, prior to constructing a toll project or turnpike project, the Secretary and local units of government to prepare and present a joint proposal for construction of a toll or turnpike project to the KTA and the State Finance Council. The bill would require the Secretary and local units of government to receive resolutions approving the construction from the KTA and the State Finance Council. The bill would define “local unit or units of government” and “approving” for this purpose. The bill would characterize the approvals by the State Finance Council as matters of legislative delegation. (Section 5)

The bill would require tolls be charged only on users of the additional capacity of the highway or bridge constructed and on all users of any new project, regardless of class, size, or kind of traffic. The bill would require the Secretary to use
toll revenue to pay for the cost of the project for which the toll was collected and would forbid the Secretary from using toll revenue for payment of costs not associated with the project for which the toll was collected. (Section 5)

The bill would remove a requirement the Secretary recommend to the Legislature the construction of a new toll project or turnpike project or designation of an existing highway or portion thereof and would authorize the Secretary to construct such toll road after meeting the proposal and approval requirements of Section 5. The bill would state the Secretary must determine such new or added capacity is feasible. (Section 6)

The bill would make technical changes.

Background

The substitute bill contains the contents of SB 192 as amended by the Senate Committee on Transportation. Contents of HB 2007, as amended by the House Committee on Veterans and Military, regarding license plates for military veterans and active-duty military members are included in HB 2246 as amended by the Senate Committee on Transportation.

SB 192

The bill was introduced by the Senate Committee on Ways and Means. It addresses a recommendation of the Joint Legislative Transportation Vision Task Force, which met during the 2018 Interim.

At the Senate Committee on Transportation hearing, the Acting Secretary of Transportation (Acting Secretary) and representatives of the American Council of Engineering Companies of Kansas, Kansas Contractors Association, Kansas Society of Professional Engineers, and Wichita
Regional Chamber of Commerce provided proponent testimony. Written-only proponent testimony was provided by representatives of the Greater Topeka Chamber of Commerce; Kansas Good Roads, Inc.; and the Overland Park Chamber of Commerce. Proponents stated the bill would add an option for transportation infrastructure funding, require that any additional tolled facility add capacity to the highway system, and require local consultation on any such project. The Acting Secretary requested an amendment to require the State Finance Council approve any tolled project; the suggested amendment was supported by representatives of the American Council of Engineering Companies of Kansas and the Kansas Contractors Association.

Opponent testimony was provided by a representative of the Kansas Motor Carriers Association, who requested no existing facilities be tolled unless capacity is increased and no class of vehicles be singled out. Opponent testimony also was provided by the owner of ten 24-7 Travel Stores in Kansas, who discussed commerce that is easily accessible from current routes. The Chief Executive Officer of the KTA provided neutral testimony, stating the KTA was prepared to partner with the Kansas Department of Transportation (KDOT), local communities, or private stakeholders to deliver projects where tolling is found to be feasible.

The Senate Committee on Transportation amended the bill to:

- Remove requirements the KTA construct a turnpike project;
- Specify the Secretary would evaluate and determine the feasibility of designating new or added capacity, rather than a portion or portions, of a highway;
- Authorize the Secretary to construct a toll road after meeting the amended requirements of KSA 60-20,120 (Section 5);
- Require any toll or turnpike project add capacity or a new highway or bridge where none had existed;
- Charge tolls only on users of the additional capacity;
- Require toll revenue to be used for the project for which the toll was collected and forbid use of toll revenue to pay other costs;
- Charge tolls on all users, regardless of vehicle class, size, or kind of traffic; and
- Require the Secretary and local units of government to prepare a joint proposal for a toll or turnpike project, and approval of the KTA and the State Finance Council for the project.

According to the fiscal note prepared by the Division of the Budget on SB 192, as introduced, KDOT indicates the bill could result in increased expenditures for feasibility studies for toll projects. Any constructed projects would require expenditures, and there would be revenue from tolls. However, KDOT is unable to estimate the fiscal effect because the number of feasibility studies and new projects is unknown. Any fiscal effect associated with enactment of the bill is not reflected in The FY 2020 Governor’s Budget Report.
