

Senate Resolution No. 1724

By Committee on Public Health and Welfare

1-13

1 A RESOLUTION supporting the Global Covid Summit Physicians
2 Declaration II and its three foundational principles for public policy in
3 response to COVID-19.

4
5 WHEREAS, Physicians around the world, loyal to the Hippocratic
6 oath, recognize the imminent threat to humanity brought forth by current
7 COVID-19 policies; and

8 WHEREAS, After 20 months of research conducted, millions of
9 patients treated, hundreds of clinical trials performed and scientific data
10 shared, physicians have demonstrated and documented their success and
11 understanding in combating COVID-19; and

12 WHEREAS, These physicians drew up a set of foundational principles
13 that should guide every community's response to COVID-19; and

14 WHEREAS, The first foundational principle is that healthy children
15 should not be subjected to forced vaccination; and

16 WHEREAS, There are negligible clinical risks from a COVID-19
17 infection for a healthy child under 18 years of age; and

18 WHEREAS, The long-term safety of current COVID-19 vaccines in
19 children cannot be determined prior to instituting these policies; and

20 WHEREAS, Without reproducible, long-term data about the safety of
21 these vaccines, the risks to the long-term health of children remain too
22 high to support COVID-19 vaccines and vaccine mandates for healthy
23 children; and

24 WHEREAS, From receiving the vaccine, children risk severe adverse
25 events, including permanent damage to the brain, heart, immune system
26 and reproductive system associated with COVID-19 spike protein-based
27 genetic vaccines; and

28 WHEREAS, The second foundational principle is that naturally
29 immune individuals who have recovered from COVID-19 should not be
30 subjected to any restrictions or vaccine mandates; and

31 WHEREAS, Natural immunity is the best long-lasting solution against
32 the development of COVID-19 disease and its more serious outcomes;
33 and

34 WHEREAS, Naturally immune people have the lowest risk of virus
35 transmission and should not be subject to travel, professional, medical or
36 social restrictions; and

1 WHEREAS, Natural immunity is the most effective source of herd
2 immunity, a condition necessary for eradicating the COVID-19 virus; and

3 WHEREAS, The third foundational principle is that all health
4 agencies and institutions should stop interfering with physicians treating
5 individual patients; and

6 WHEREAS, Early intervention with numerous available agents have
7 been proven to be safe and effective; and

8 WHEREAS, Medicine that has already been given regulatory approval
9 should not be restricted from "off-label" use, particularly during a global
10 humanitarian crisis caused by a rapidly mutating virus that requires fast
11 adapting treatment strategies; and

12 WHEREAS, Health agencies should be prohibited from interfering
13 with physicians prescribing evidence-based treatments that physicians
14 deem necessary; and

15 WHEREAS, Insurance companies should cease blocking payments for
16 life-saving medicine prescribed by physicians; and

17 WHEREAS, Violating any of these three principles unnecessarily and
18 directly risks death to Kansas citizens: Now, therefore,

19 *Be it resolved by the Senate of the State of Kansas:* That we support
20 the three foundational principles of the Global Covid Summit Declaration
21 II; and

22 *Be it further resolved:* First, healthy children should not be subjected
23 to forced vaccination; and

24 *Be it further resolved:* Second, naturally immune individuals who
25 have recovered from COVID-19 should not be subjected to any
26 restrictions or vaccine mandates; and

27
28 *Be it further resolved:* Finally, all health agencies and institutions
29 should stop interfering with physicians treating individual patients; and

30 *Be it further resolved:* That the Secretary of the Senate shall send
31 enrolled copies of this resolution to the Governor of Kansas, the
32 Secretary of the Kansas Department of Health and Environment, every
33 county health director in Kansas, every county health department in
34 Kansas, every chairperson of a county commission in Kansas and every
35 chairperson of a school board in Kansas.
