

January 31, 2024

The Honorable Ken Rahjes, Chairperson  
House Committee on Agriculture and Natural Resources  
300 SW 10th Avenue, Room 112-N  
Topeka, Kansas 66612

Dear Representative Rahjes:

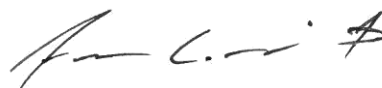

SUBJECT: Fiscal Note for HB 2607 by House Committee on Agriculture and Natural Resources

In accordance with KSA 75-3715a, the following fiscal note concerning HB 2607 is respectfully submitted to your committee.

HB 2607 would amend the current Kansas Pesticide Law and Kansas Chemigation Safety Law. The bill would enhance requirements for pesticide applicator education and safety, establish additional categories of licensure and certification including pesticide applications of sodium cyanide for predator control, provide mandatory training for uncertified applicators, and establish record keeping requirements. Additionally, the bill would update provisions relating to civil and criminal penalties for violations and require licensees and applicants to provide a certificate of liability insurance for proof of financial responsibility that is required under current law. Finally, the bill would eliminate the requirement of the Department of Agriculture to complete a determination of "sufficient rehabilitation" before issuing a license or certification to an individual that has self-reported a prior felony conviction.

The Department of Agriculture indicates the enactment of HB 2607 could increase agency fee revenue in both FY 2025 and FY 2026 with the addition of the licensure and certification of sodium cyanide applications; however, the Department cannot estimate a fiscal effect as it cannot accurately determine if current commercial applicators would choose the new method. The Kansas Department of Health and Environment indicates the enactment of HB 2607 would not have a fiscal effect on the agency. Any fiscal effect associated with HB 2607 is not reflected in *The FY 2025 Governor's Budget Report*.

Sincerely,

Adam C. Proffitt  
Director of the Budget

cc: Lita Biggs, Department of Agriculture  
Amy Penrod, Department of Health & Environment
