# SB 150

- The intent of this bill is to allow the State Print Plant to be a printing resource for local units of government.
- The Department of Administration will not compete with private printing businesses.
  - The Covid-19 pandemic affected many smaller print businesses.
- The State Print Plant will be an additional option available to cities, counties and schools if private businesses cannot meet their needs.
  - The reduced number of printing businesses since Covid-19 has affected some units of government in their ability to print government documents in a timely manner.
- One example is the envelope converter.
  - The State Print Shop can efficiently produce large numbers of envelopes quickly.
