Michael J. Hammond  
Executive Director

### Testimony to the House Appropriations Committee on KanCare Oversight

March 21, 2012

Mister Chairman and members of the Committee, my name is Mike Hammond and I serve as the Executive Director of the Association of Community Mental Health Centers of Kansas, Inc. The Association appreciates the opportunity to submit this written testimony in support of H.B. 2789, creating the Joint Committee on KanCare Oversight.

The Association represents the 27 licensed Community Mental Health Centers (CMHCs) in Kansas who provide home and community-based, as well as outpatient mental health services in all 105 counties in Kansas, 24-hours a day, seven days a week. In Kansas, CMHCs are the local Mental Health Authorities coordinating the delivery of publicly funded community-based mental health services. As part of licensing regulations, CMHCs are required to provide services to all Kansans needing them, regardless of their ability to pay. This makes the community mental health system the "safety net" for Kansans with mental health needs, collectively serving 123,000 Kansans with mental illness.

As you are aware, the Administration has proposed KanCare, an ambitious approach through improved care coordination and reduced fragmentation across programs to improve overall health outcomes for Medicaid beneficiaries and to slow the growth of Medicaid expenditures. All while preserving Medicaid rates, eligibility and benefits. We agree that path we are on today is not sustainable and we are appreciative of the opportunity the Administration has given us for dialogue and input on their proposal. This is an important policy direction for the State of Kansas that has received and should continue to receive meaningful attention.

Of course the devil is in the detail and that detail will be in the contract between the State and each MCO, as well as in how each contract is implemented. No matter how well you plan for systems transformation, there inevitably will be struggles, challenges and problems along the way. Ensuring there is adequate and effective oversight in the Executive Branch as well as the Legislative Branch will be critical. With that oversight, we are hopeful Kansas can avoid the mistakes of other States, and if not avoid them entirely, make the necessary adjustments during implementation to minimize negative outcomes on Kansans.

In the end, access to care when it is needed and at the right amount is paramount. We will remain strong in our advocacy to ensure that continues to occur in the new world of managed care.

The Association and its members urge you to report out favorably H.B. 2789 for passage. Thank you for the opportunity to submit this written testimony.
