

The experience and dedication you deserve

March 23, 2012

Mr. Alan Conroy Executive Director Kansas Public Employees Retirement System 611 South Kansas Avenue, Suite 100 Topeka, KS 66603

Re: Cost Projections under HB 2194, HB 2545, and Senate Cash Balance Plan Design (Prepared at request of President Morris/Senator Kelly)

Dear Alan:

As you requested, we have performed a cost study to compare the estimated employer costs under HB 2194, HB 2545, and the Cash Balance Plan prepared at the request of President Morris and Senator Kelly (referred to in this letter as "Senate Cash Balance Plan (Morris/Kelly)". The cost estimates for HB 2194 and HB 2545 shown in the attached exhibits are the same as those provided in our cost study letter for the Study Commission Plan, dated January 23, 2012. The basic plan provisions of the Senate Cash Balance Plan (Morris/Kelly), on which our cost projections are based, are set out below. For purposes of the cost projections for the proposed cash balance plan, the effective date of the new plan design is January 1, 2014. All employees hired on or after that date become members of KPERS Tier 3. Current members of KPERS on January 1, 2014 remain members of Tier 1 or 2.

### **Cash Balance Plan Design**

A summary of basic plan provisions upon which our cost projections are based include:

- The employer credit to the cash balance account is 4% per year.
- The guaranteed interest credit is 6% per year with interest credited quarterly. Discretionary dividends may be granted by the KPERS Board of Directors after taking the funding, market conditions, actual investment returns, and other relevant factors into account. The discretionary dividends will only be credited to the account balances of members with at least 10 years of service. The maximum dividend is 4%.
- Employee contribution rate is 6% of pay.
- 100% vesting after five (5) years of service.
- Normal retirement date is earlier of age 60 with 30 years of service or age 65 with 5 years of service
- No early retirement provision.

Mr. Alan Conroy March 23, 2012 Page 2

- Upon termination of employment, a vested member may elect to withdraw their employee account balance, but will forfeit the benefit payable from the employer account value. If the member leaves their employee contributions in the System, they may retire upon reaching normal retirement age with benefits based on the total account value (employer plus employee).
- When the member retires at normal retirement age, the member can elect to receive 10%, 20% or 30% of the total account balance (employee and employer) as a lump sum. The remaining balance must be converted to a monthly benefit, based on the form of payment selected by the member. The annuity amount is determined by the annuity conversion factors which are based on a 6% interest rate and a mortality table selected by the Board.
- Normal form of payment is a five year certain and life annuity.
- If a member dies prior to reaching the normal retirement age of 65, no benefit is payable and the account balance is forfeited unless (i) the member is vested; (ii) the member has at least five (5) years of service at death; and (iii) the member's spouse at the time of death is designated as the sole primary beneficiary. In that case, the spouse shall receive a benefit when the member would have reached his normal retirement age.
- If a member becomes disabled while actively working, such member shall be given participating service credit for the entire period of his disability. Such member's account shall be credited with both the employee contribution and the employer credit until the earliest of (i) death; (ii) attainment of normal retirement age; or (iii) the date the member is no longer entitled to receive disability benefits.
- A benefit of \$4,000 is payable upon a retired member's death.

## **Statutory Contribution Cap**

In KPERS, the employers do not necessarily contribute the full actuarial contribution rate. Based on legislation passed in 1993, the employer contribution rates certified by the Board may not increase by more than the statutory cap. The current statutory cap, which has been changed periodically, is 0.60% for the State, School and Local groups. Senate Substitute for HB 2194 increased the statutory cap over a four year period beginning with 0.9% in FY 2014 to an ultimate cap of 1.2% in FY 2017.

HB 2545 eliminates the statutory cap on employer contributions, effective July 1, 2013. Therefore, this provision is reflected in the cost projections for HB 2545.

The increases in the statutory cap on the employer contribution rate contained in Senate Substitute for HB 2194 are maintained in the cost projections of the proposed Senate Cash Balance Plan (Morris/Kelly).

#### Senate Substitute for HB 2194

The cost projections for HB 2194 shown in this study are based on the default elections provided under Senate Substitute for HB 2194 as passed by the 2011 Legislature. In addition, the projections for HB 2545 and the Senate Cash Balance Plan (Morris/Kelly) also reflect the default benefit provision changes for KPERS Tier 1 and 2 members included in Senate Substitute for HB 2194.

Mr. Alan Conroy March 23, 2012 Page 3

## **Actuarial Assumptions and Methods**

In general, the same actuarial methods and assumptions that were used in the December 31, 2010 actuarial valuation were used in these cost projections unless otherwise noted. In addition, the actuarial assumptions used to generate the cost projections for HB 2545 are the same as those outlined in our letter dated January 23, 2012. They include an 8% assumption for the interest crediting rate and annuity conversion factors based on a 6.5% postretirement interest rate and the RP 2000 Mortality Table projected to 2035. Because retirement eligibility requirements are different under both HB 2545 and the Senate Cash Balance Plan (Morris/Kelly) than those in the current plan and the benefits provided are also different, the retirement patterns are expected to change. Cavanaugh Macdonald selected retirement rates under HB 2545 and the Senate Cash Balance Plan (Morris/Kelly) that we believe are reasonable given the limited knowledge we have at this time about behaviors that will occur many years in the future. However, actual experience may vary, at times significantly, from the assumptions used in these projections. If it does, the cost projections will also be impacted.

The Senate Cash Balance Plan (Morris/Kelly) provides for a guaranteed interest credit of 6%, but also provides that a dividend may be granted at the discretion of the KPERS Board of Directors subject to certain conditions. Discretionary dividends may be granted by the KPERS Board of Directors after taking the funding, market conditions, actual investment returns, and other relevant factors into account. The discretionary dividends will only be credited to the account balances of members with at least 10 years of service. The maximum dividend in any given year is 4%. Therefore, an assumption is needed to anticipate the long term effective interest crediting rate, reflecting both the guaranteed rate and the dividends. Due to time constraints related to the modeling of costs, there was insufficient time to perform a comprehensive analysis to determine the expected total interest crediting rate, including the additional dividends that may be granted by the Board. Based on very limited analysis, an assumption of 6.0% for the first 10 years of employment and 8% thereafter was used for purposes of this cost study. If this Cash Balance plan design moves forward, further modeling of the expected rates of return on the KPERS portfolio and the resulting dividend crediting rate should be completed so the actuarial assumption can be further refined. Any change in this assumption will impact the cost projections attached to this letter. If all other plan design parameters and actuarial assumptions are unchanged, a lower interest crediting rate will reduce the costs and a higher assumed crediting rate will increase the costs shown in the attached exhibits.

All vested members in the proposed Cash Balance Plan are assumed to leave their employee account balance in the Cash Balance Plan when they terminate employment and receive benefits based upon the total account value at normal retirement age. Any modification of this provision, such as giving vested terminated members part or all of the account value due to employer credits at termination, would impact the cost projections. In addition, the assumption for the portion of the retirement benefit paid as a lump sum at normal retirement was set to 30% of the account balance.

HB 2545 and the proposed Cash Balance Plan are both defined benefit plans so our modeling assumes that the new tier will be combined with the existing KPERS Tiers 1 and 2 in one system with one trust. However, separate employer contribution rates will continue to be determined for the State/School group and the Local group. The actuarial valuation will reflect the future benefit payments for Tier 3 members along with those for Tier 1 and 2 members and one overall employer contribution rate will be developed for each group, which includes the UAL payment, to be paid on all covered payroll (Tier 1, Tier 2 and Tier 3 members). From an actuarial perspective, the valuation process is unchanged other than reflecting the new benefit structure for Tier 3 members.

The amortization period used in the cost projections remained at a closed 22 year period starting on December 31, 2010. In order to mitigate the impact of the time lag between the valuation date and the

Mr. Alan Conroy March 23, 2012 Page 4

fiscal year in which the contribution rate is effective, the amortization period was set to an open ten year period in 2030 for all cost projections.

### **Results**

The cost impact of the various proposed plan designs will unfold over time as current Tier 1 and Tier 2 members leave covered employment and are replaced by Tier 3 members. Therefore, a projection of costs over a long period of time is necessary to see the long term impact of the proposed change. The cost estimates for HB 2194, HB 2545, and the proposed Senate Cash Balance Plan (Morris/Kelly) are reflected in the attached exhibits which show the expected employer contribution rate under each plan design by year for the State/School and Local groups (Exhibits A1 and A2) and the estimated dollar amount of employer contributions in each future year (Exhibits B1 and B2). The projections assume that all actuarial assumptions, including the 8% investment return assumption, are met in the future. Please note that the dollar amounts of employer contributions shown are future dollar amounts, calculated using the estimated employer contribution rate and projected payroll in future years. Due to the length of the projection period, the future payroll amounts grow significantly and the resulting contributions in nominal dollars in those years can appear very large. In order to provide a method for more direct comparison of results, the present value of the difference in the employer contributions has been included in the right hand column for each set of projected contributions on Exhibits B1 and B2 by year and in the aggregate. The employer contribution rate also provides a reliable way to compare the cost of various plan designs in the future. Exhibits C1 and C2 split the projected employer contributions into normal cost and UAL payments by year and in total for HB 2194 and the proposed Senate Cash Balance Plan (Morris/Kelly).

The cost projections attached to this letter are based on one set of actuarial assumptions, which include an 8% assumed rate of investment return. The cost projections for the various plan designs are sensitive to the assumptions used, particularly the investment return assumption. However, the impact of different assumptions varies for each of the three plan designs because they are different from each other. Further analysis can be provided upon request if it is deemed to be necessary or helpful.

It should also be noted that the different plan designs reflected in HB 2194, HB 2545, and the proposed Senate Cash Balance Plan (Morris/Kelly) do not provide the same amount of retirement benefits. This, in turn, has an impact on the cost of the plan designs. Therefore, the cost projections should not be evaluated in isolation from the benefit amounts provided by each plan design.

### Disclaimers, Caveats, and Limitations

The numerical charts that comprise this study are based primarily upon the December 31, 2010 valuation results, the actuarial assumptions used in the valuation (other than as noted in this letter), and the projection model prepared by the System's actuary, Cavanaugh Macdonald Consulting, LLC. Significant items are noted below:

- Investment return in all future years is assumed to be 8% on a market value basis, unless otherwise indicated.
- All demographic assumptions regarding mortality, disability, retirement, salary increases, and termination of employment are assumed to hold true in the future. Please note that the actuarial assumption assumes that mortality will improve in the future (i.e. people will live longer).
- Changes in the retirement plan eligibility and benefit amounts may have an effect on future termination and retirement patterns. While we have attempted to reflect the change in retirement eligibility under HB 2545 and the Senate Cash Balance Plan (Morris/Kelly), how changes in the benefit structure may ultimately impact termination of employment patterns cannot be known at this time. Therefore, no changes have been modeled.

- The number of active members covered by KPERS in the future is assumed to remain level (neither growth nor decline in the active membership count). As active members leave employment, they are assumed to be replaced by new employees who have a similar demographic profile as recent new hires.
- Plan provisions for Tiers 1 and 2 are modified in accordance with Senate Substitute for HB 2194, for all three projections. Tier 3 benefits are provided under either HB 2545 or the proposed Senate Cash Balance Plan (Morris/Kelly) as described earlier in this letter. There are no other benefit changes reflected in future years.
- The projections for the proposed Senate Cash Balance Plan (Morris/Kelly) reflect the assumed total interest credits (guaranteed plus discretionary) of 6.0% for the first ten years of employment and 8.0% thereafter. If the actual interest credits and dividends granted are more than assumed, it will generally increase the cost of the plan. If actual interest credits granted are less than assumed each year, the cost of the plan will be lower, all other factors being equal.
- The funding methods including the entry age normal cost method, the asset smoothing method, and the amortization method and period remain unchanged other than as noted elsewhere in this letter
- The state and local employers will contribute as scheduled under HB 2194 (with consideration to changes in the statutory caps in that legislation) and with no statutory cap under HB 2545. The projections for the Senate Cash Balance Plan (Morris/Kelly) reflect the same statutory cap as HB 2194.
- We relied upon the membership data provided by KPERS for the actuarial valuation. The numerical results depend on the integrity of this information. If there are material inaccuracies in this data, the results presented herein may be different and the projections may need to be revised.

Models are designed to identify anticipated trends and to compare various scenarios rather than predicting some future state of events. The projections are based on the System's estimated financial status on December 31, 2010, and project future events using one set of assumptions out of a range of many possibilities. A different set of assumptions would lead to different results. The projections do not predict the System's financial condition or its ability to pay benefits in the future and do not provide any guarantee of future financial soundness of the System. Over time, a defined benefit plan's total cost will depend on a number of factors, including the amount of benefits paid, the number of people paid benefits, the duration of the benefit payments, plan expenses, and the amount of earnings on assets invested to pay benefits. These amounts and other variables are uncertain and unknowable at the time the projections were made. Because not all of the assumptions will unfold exactly as expected, actual results will differ from the projections. To the extent that actual experience deviates significantly from the assumptions, results could be significantly better or significantly worse than indicated in this study.

This exhibit is an attachment to a letter that contains important information and explanations regarding the numbers shown. Therefore, the exhibit should only be considered with the accompanying letter from Cavanaugh Macdonald dated March 23, 2012. All assumptions, including the 8% investment return, are assumed to be met each year in the future.

### Exhibit C1

# Kansas Public Employee Retirement System Comparison of State/School Group Employer Contributions for Retirement Benefits HB 2194 versus Senate Cash Balance Plan (Morris/Kelly)
