SUPPLEMENTAL NOTE ON SENATE BILL NO. 367

As Amended by Senate Committee on Education

Brief*

SB 367 would enact the Student Data Privacy Act that would provide restrictions on what data contained in a student’s educational record can be disclosed, and to whom it may be disclosed. The bill would require that any student data submitted to and maintained by a statewide longitudinal student data system could be disclosed only to individuals or organizations as outlined in the bill.

The bill would permit student data to be disclosed at any time to the following:

- The student and the student’s parent or legal guardian, but only if the data pertains solely to that student;
- Authorized personnel of the State Department of Education, school district, or the Kansas Board of Regents who require such disclosures to perform their assigned duties; and
- Any authorized personnel of any state agency with a data sharing agreement between the state agency and the educational institution.

Authorization would be granted for disclosure of student data to any state agency not specified above, provided there is a data-sharing agreement between the relevant educational agency and the state agency that provides for

specific procedures, including data security and destruction or return of the data at the appropriate specified time.

The bill would permit student data to be disclosed to any governmental entity not otherwise specified or to any public or private audit and evaluation or research organization, provided the data disclosed is aggregate, contains no personally identifiable student information, and the disclosure is made in compliance with the federal Family Educational Rights and Privacy Act. Personally identifiable information could be disclosed if an adult student or a minor student’s parent or legal guardian consents in writing.

The bill also would allow the disclosure of any information required to be disclosed to public health officials for urgent health or safety reasons, in which cases confidentiality requirements would apply.

The bill would prohibit school districts from collecting biometric data, or assessing a student’s emotional state unless written consent is granted. The bill would grant the Attorney General or any district attorney enforcement authority. The bill also would require the Department to publish annually on its website a list of the categories of student data that are collected by any statewide longitudinal student data system.

**Background**

Proponents at the hearing before the Senate Committee on Education included representatives from Educational Management Consultants and the Kansas Association of School Boards.

A representative of the Kansas Department of Health and Environment testified regarding concerns that the bill may impede the work of local health departments to prevent and control infectious diseases because it would not allow for disclosure of student data to public health officials for urgent
health or safety reasons. A representative of the Kansas Board of Regents asked for a technical amendment to remove references to postsecondary educational institutions, since those institutions are not involved in the activities addressed in the bill.

The Senate Committee on Education amended the bill to allow for disclosure of student data to public health officials for urgent health or safety reasons and to make technical changes.

According to the fiscal note prepared by the Division of the Budget, the State Department of Education indicates enactment of the bill would have no fiscal effect.
