

Pinky, a strawberry candy flavor! That is the flavor that keeps me from going back to cigarettes. My name is Kesha Brandt and I now run 6 Vapor stores across the state of Kansas. 7 years ago my life was drastically different, my grandmother was fighting for her life with stage 4 Lung cancer from a lifetime of smoking Camel cigarettes. She lost her fight in just a few short weeks after diagnosis on February 10, 2012. Within a couple months we got another call, yet another grandmother was diagnosed with stage 4 lung cancer and it didn't look promising. She lost her battle on August 12, 2012. I had been a smoker for 12 years, I had to quit. I had to make sure I was there for my kids and to be able to meet my grandchildren. I tried the patches, the gums, even prescriptions from the doctor and nothing seemed to work. I finally decided to give vaping a try, and while it took a couple of weeks to get the correct nicotine figured out, I knew this time I would succeed. I would beat TOBACCO! It took me just a few weeks to cut the nasty habit out of my life completely! I knew instantly that I wanted to help educate people about vaping, and what it is, and how it can help them get off of different tobacco products. With all the different flavor options everyone can find their flavor that helps them give up tobacco. I started my first store on May 1st 2014. I emptied my savings and took a chance, and let me tell you, it paid off. I have helped THOUSANDS of Kansans give up their death sentence, and within the first year I saved my entire family from theirs. Over the last 6 years I have expanded to 6 locations that employ more than 30 people. You know what's even better? They all now get to experience the joy when your customer comes in to tell you they are completely off cigarettes and they can breathe again! They have the energy to play with their kids or grandkids! They can go outside and play with the dog without running out of breath! I know how that feels, I have been on breathing treatments for my asthma my whole life, even while I was a smoker, and I haven't had to have one since the month I started vaping! We all have our own story but they all give the same message. VAPING SAVES LIVES! Please don't take away any Kansan's RIGHT to make a choice.
