Hello. I currently work with a medical staffing agency. I just want to let you know that without them, I would be living paycheck to paycheck. I am a single mom with a 8 month old. When I would work through agency I would be the only one working on the covid halls. I dont know how the facilities will make it if no one from the facilities wants to work them. I'm sorry but this is not the time to be having the facilities suffer more because they are so short staffed even before the pandemic. It is not fair to cap the healthcare workers when the facilities do not want to pay their workers adequate wages. I just now started to go back to school to receive my Certified medicine aide certificate to better my son's life. I wouldn't have been able to afford it if it was not for the staffing agency I am with. Please take in consideration that without us frontline workers the facilities might shut done and neglect the residents. The nurses and nurse aides are so burnt out. We are here to help.
