House Judiciary Rep. Fred Patton Chair.

SB367 03/08/22 Nick Reinecker Private Citizen Opponent

Mr. Chairman and Committee,

I am an opponent to this bill for one reason. Dangerous drugs, as defined on page 2, lines 11 through 13, does not include, alcohol, aspirin, or cough syrups including those with dextromethorphan. Knowing that the lethal dose of these substances is far less than cannabis could ever be, if at all, my only opposition to this bill could be subsided by changing the word dangerous to controlled or illegal.

Thank you

Nick Reinecker
