EXTERNAL: This email originated from outside the organization. Do not click any links or open any attachments unless you trust the sender and know the content is safe.

To the Committee and Rep. Landwehr: Please consider this to be formal notice that I wish to testify in favor of the aforementioned HB, so as to protect minors from being the victims of a gross campaign to pretend that so-called "gender transition" is ever possible. It is not. Even so-called "gender trans surgeons" admit their utter inability to forecast any degree of medical well-being in the wake of their horrific experiments on humans: <https://www.cf.org/news/portland-surgeon-who-performs-sex-change-surgery-on-children-admits-the-sad-truth/>.

I am a nurse and an attorney but no one need be either to know that the recent mania to "trans" children/minors is not only unsupported by medical science, but indeed contrary to well-settled science, to wit: That sex is determined at conception and that no "gender-trans surgery" can ever, at any time, under any circumstances reverse the sex of an individual, either via hormonal treatments or plastic surgery. Every single cell in the body of every single human being literally screams "male or female" since each cell is encoded by XX or XY chromosomes.

In addition to that fact, the present mania to permit minors to **themselves** consent to such treatments flies in the face of literally thousands of years of Contract Law. Minors/children have always been held incompetent to contract **in any capacity** on their own behalf, due to their very existence as minors. Even those who support such consent contradict themselves since they are the same individuals who, after supporting this "care and consent", then go on to testify that minors should never be tried in our criminal justice system as adults. Why? Because the brains of minors are not sufficiently developed to support the requisite level of intent for such prosecutions.

Kathy Brown, Esq.
