

Senate Bill 128
Proponent written

Chairman Tyson and members of the Committee

Just wanted to express how helpful this bill would be for parents needing to pursue educational opportunities outside of the public school districts.

For context, we send our seven year old to private school while our kindergartener attends public kindergarten (due to not all day kindergarten available at private school), so we've had a bit of a taste of both environments and although I'm very supportive of the public schools endeavor to try to improve things, but they have limitations and we have found a warm fun educational environment at the private school. I think maybe they're just spread too thin and although I can't respect that, my quiet children that deal with anxiety don't flourish in that environment.

Please consider approving the SB128 so that as parents we can continue to provide the best educational sources for our children that don't fit the mold of the public school well, as inflation, insurance rates, and taxes have gone up over the last year it is quite a challenge.

Thank you for your time!

Sincerely,
Elizabeth Hingst
