

In Support of SB391 Restricting secretary of health and environment's authority to quarantine and impose penalties.

To: Senate Committee on Public Health and Welfare  
February 13, 2024

Chairman Gossage, and distinguished committee members:

Please support SB 391. Please pass this legislation. Centralized decision making is unwise. One single solution or plan does not work equally well for all. It is good for those in positions of power to make recommendations of what actions people may take but it is never good for one person to impose their will on another person while using the force of government. I am speaking of basic human rights.

Thank you for your consideration.
