

Matthew Willis,

I am requesting that you as Kansas legislature honor your commitment to special education students and all students and fund SPED at 92% of district excess costs as that has already been defined.

My Granddaughter Ellie Johnson has a rare disease that causes her to require special needs to learn and without her SPED classes through Life Skills she would not be able to learn or attend public school.

COVID already set her back and the results of hiring struggles they need the funding to provide her and her peers either the best quality of education. I pay my taxes and want nothing cut from my grand-kids.

May be it's time to limit the requirements of what funding is given to all the schools sports teams, but not these children!
