Distinguished Senators:

I urge you to support the passage of SB560.

My 37 year old daughter is battling ovarian & liver cancer. The chemotherapy treatments she must endure cause extreme discomfort.

As a step mother and parent witnessing this battle and helpless to ease the pain, the use of cannabis is the only drug that provides instant and lasting relief for my daughter.

Please support SB560 and provide some relief/comfort for those that are suffering through an already angry and debilitating disease, both physically and emotionally.
