

Pipeline Safety; HB 2329

HB 2329 modifies the list of entities that are subject to Kansas Corporation Commission (KCC) rules and regulations adopted to ensure conformity with the federal Natural Gas Pipeline Safety Act (Act). The bill makes subject to such rules and regulations operators of “gathering lines,” or pipelines transporting gas from a current production facility to a transmission line or main, provided that such operators are regulated by the Act, and removes an exclusion for farming or activities associated with the production of oil or gas.
